

Rajeev Sharma

Senior AI & technology architect | Digital Transformation & Governance Leader

[Ask for demo of my AI work ☺](#)

What I Offer

With over 27 years of experience across Manufacturing, Consulting, Retail, and Pharmaceuticals, I offer strategic thinking driven by customer value and emerging industry trends. I act as a change agent for organization-level transformations, refining business models to establish new product lines and drive digital excellence. My approach combines hands-on execution with the realization of synergies, specifically focusing on team transition in alignment with corporate strategies. I have driven key initiatives in Data-driven business operations, Governance, M&A, Finance Management and Enterprise platforms such as ERPs. As a proponent of leveraging technology to enable change, I am currently pivoting toward Agentic AI, having personally developed products to demonstrate how industries can leverage this revolutionary technology for tangible impact.

I have a proven track record of transforming global organizations to deliver millions in synergies and value adds. In recent years, I have been part of IT function with close alignment with business functions.

What I look for

I am seeking a consulting or permanent position with an organization that embraces change and views AI technologies as future frontiers. I am passionate about process and data-driven initiatives, where I can review existing workflows and enhance effectiveness through technology, platforms, and people change management. I look for a role with direct exposure to business functions that impact bottom-line growth. Beyond the digital space, my interests extend to financial analysis, real estate, and investments, reflecting a holistic mindset geared toward value creation and optimization.

Who I am

With a career spanning India, the USA, the UK, and Switzerland, I have built a diverse global perspective on Business, technology and leadership. I am a lifelong learner with passion to solve problems, I consider myself to be critical thinker with optimistic outlook. In addition to my professional career, I have also been an entrepreneur in Ed-Tech, IT consulting and Fin-Tech domains. Few of the key areas I have worked professionally include 1) Product Design, development and launches, 2) Business Development and Offshore setups 3) Business Process optimization 4) ERP program management 5) PMO & IT service Management 6) IT governance for Process and Finance 7) PMO for post M&A 8) Customized ERP & CRM application 9) Digital Transformation consultation 10) IT Project Management and Service management platforms ownership 11) Gen AI, AI development, and Agentic AI.
