

What I Offer

As an engineer with mechanical and computational engineering degrees and an MBA HSG, I have developed into a business development leader. I have driven strategic partnerships, commercialized innovations and customer centric product development in MedTech, Industrial, automotive, and tech start-up markets.

I bring a holistic understanding of business development, operating at the intersection between engineering and business with a strong customer focus. From market analysis to concept, product development, and commercialization, I guide through with a hands-on, strategic approach. My approach is complemented by financial insight, planning, and forward-thinking vision. In doing so, I rely on strong analytical skills and years of experience in leading projects. A natural presenter, I can inspire people with trust and collaboration. With my open, positive personality, I quickly build sustainable partnerships and, as a leader, coach, and sparring partner, I shape corporate culture driven by a passion for innovation and performance.

What I look for

I am seeking a position where I can bring my expertise, experience, and personality – whether in business development, product management or in a more strategic and project-related role. I thrive in environments requiring market-oriented thinking and action within technology-driven industries. I am looking for a company that is interested in long-term cooperation and mutual growth. Are transparency and optimism in cooperation also important to you? Then we should definitely get to know each other.

Who I am

After my education in India and Germany, I moved to Switzerland, where I've built a fulfilling family life and a global career while fully embracing the local culture. In my free time, I enjoy hiking and actively participate in a local motorcycle club, where I organize group rides and events. Currently on paternity leave, I support companies on a mandate basis in PMO and market entry initiatives.

Professional Experience

2024 – Present	Business Consultant (Mandate Basis) · Sigma Plus Associates GmbH · Mandate based Project support in PMO and Market entry initiatives · Assisted an Indian pump manufacturer in entering the Swiss pharma market · Analysed emerging industrial applications for vacuum products, including TAM/SAM/SOM assessment, and develop Go-To-Market plans
2021 – 2023	Leader Business Development Advanced Technology · Datwyler Schweiz AG · Drove strategic partnerships and co-development strategies in healthcare, Automotive, Industrial sectors and Innovation hubs · Provided technical and managerial leadership to the team · Introduced Business Model Innovation methodology and facilitated workshops · Drove Go-to-market strategies to commercialize innovations such as bio-signal monitoring patch, elastomer-based sensors & actuators · Negotiated complex contracts including intellectual property rights · Coordinated technology evaluations and startup acquisition projects
2019 – 2021	Business Developer · Rasol Solutions GmbH · Developed strategies and drove growth for cloud-based digitalization solutions for SMEs (Tech-Stack: Java, AWS and Machine Learning)
2015 – 2018	Senior Project Manager · Stäubli ECS AG · Led the development of product portfolio in compliance with industry standards · Conducted market analysis and developed go-to-market strategies · Implemented a LEAN-based innovation and product development process
2011 – 2014	Project Manager · ABB Switzerland AG · Led the CAPEX projects to retrofit and replace medium-voltage drives systems · Developed business cases for EPC and CAPEX projects · Directed complex onsite installation and commissioning activities
2006 – 2011	Project & Product Manager · OC Oerlikon Solar / Oerlikon vacuum · Managed technical and commercial projects in the Thin-Film PV FAB sector · Conducted root cause analysis with internal experts · Coordinated backend retrofit and system modification projects · Analysed PVD and vacuum pump applications in the semiconductor market · Developed software to optimize advanced wafer packaging equipment

Education and Certifications

2024	AI for Business · University of Pennsylvania · USA
2018 – 2019	MBA Strategy and Finance HSG · University of St. Gallen
2014	PMP Project Management Professional – PMI Project Management Institute
2003 – 2006	M.Sc. Computational Engineering · University of Erlangen-Nuremberg · DE
1998 – 2002	B.E Mechanical Engineering · M.S University Tirunelveli · India
