Based in Switzerland | Open to relocate

Professional Summary

PMP®-certified Project Leader with 10+ years delivering complex technology and innovation projects across industrial R&D environments. MBA (HSG) graduate with engineering foundation, specializing in bridging technical teams with business stakeholders to drive data-driven transformation.

Expert in agile project execution, data-based process standardization, and cross-functional stakeholder alignment across global teams. Proven success leading multi-million CHF programs through full lifecycle delivery with cross-functional teams.

Ready to lead data-driven innovation projects that deliver measurable business impact.

Core Competencies

Agile Project & Product Management

- Transformed manufacturing processes into customer-centric operations, reducing development cycles by 12 months.

Stakeholder & Change management

- Executed change management strategies across cross-functional/global teams, managing resistance and aligning business objectives

Data-Driven Process Improvement & Standardization

- Standardized quality processes via digitalization, analyzed sales/customer data using statistical tools to drive strategic market decisions.

Professional Experience

2024 – Present

Project Consultant (Interim / Mandate basis) · Sigma Plus Associates GmbH

- Provide mandate-based project support for PMO and market entry initiatives
- **For INFICON:** Analyzed sales/customer data with statistical tools to drive vacuum tech market expansion, identifying optimal product-market fits
- Assisted an Indian pump manufacturer in entering the Swiss pharma market

2021 – 2023

Leader Business Development Advanced Technology · Datwyler AG

- Led strategic partnerships and co-development projects generating over 50M CHF pipeline revenue
- Drove commercialization of new sensor & actuator technologies
- Negotiated complex contracts including intellectual property rights
- Facilitated Business Model Innovation workshops; accelerated 20% increase in product launches & business innovations
- Drove market strategy for electro-active actuators, boosting prototype sales by 40% and securing two key partnerships.
- Directed technology evaluations and startup acquisition projects

2019 – 2021	Project Manager · Rasol Solutions GmbH · Developed projects and drove growth for cloud-based digitalization solutions for SMEs (Tech-Stack: Java, AWS and Machine Learning)
2019 – 2019	MBA Project in Data Strategy · SIX Group AG · Led execution of data governance and protection strategies addressing evolving regulatory requirements within bank client data management. · Evaluated regulatory impacts to strengthen data handling processes, supporting compliance and digital transformation goals.
2015 – 2018	Senior Project Manager · Stäubli ECS AG · Led CHF 30M product portfolio from ideation to launch using agile methods and design thinking, reducing development cycle by 12 months. · Implemented regression-based predictive program for targeted tele-sales, improving efficiency and reducing waste through data-driven insights · Developed and executed change management strategies for process transformation, managing stakeholder resistance and alignment · Standardized quality control processes via digitalization, delivering CHF 300k cost savings in data and process infrastructure · Introduced LEAN methodology and continuous improvement programs across sites, enhancing cross-functional team productivity
2011 – 2014	Project Manager · ABB Switzerland AG · Led CAPEX projects worth CHF 5M to retrofit & replace medium voltage drives systems, improving EBIT margins by ~7% through efficient cost management. · Developed business cases for EPC and CAPEX projects · Directed complex onsite installation and commissioning activities
2006 – 2011	Project & Product Manager · OC Oerlikon Solar / Oerlikon vacuum · Developed retrofit business with key accounts, creating a new revenue stream worth ~€4M per site and unlocking over €40M in potential revenue. · Managed technical and commercial projects in the Thin-Film PV FAB sector · Conducted root cause analysis with internal experts · Coordinated backend retrofit and system modification projects · Planned and evaluated customer-specific system modifications · Developed software to optimize advanced wafer packaging equipment

Education and Certifications

2024	AI for Business · University of Pennsylvania · USA (Remote)
2018 – 2019	MBA Strategy and Finance HSG · University of St. Gallen · CH
2014	PMP Project Management Professional – PMI Project Management Institute
2003 – 2006	M.Sc. Computational Engineering · University of Erlangen-Nuremberg · DE
1998 – 2002	Bachelor of mechanical engineering · M.S University Tirunelveli · India

Languages

German	Business fluent
English · Tamil	Native
Russian	Beginner

Volunteering

Since 2025	Finance Manager & Board Member · Integrationsnetz · Zofingen
