

Dear Recruitment Manager,

I am delighted to share my profile for consideration of “Senior Manager Digital Change” .While my CV will provide a more generic overview on my experience and area of expertise. I would like to share few points on how I can add value to the current opportunity within your esteemed organization.

Alignment with the current Opportunity:

- I have lead implementation of ServiceNow Platform in Dufry and have a detailed understanding of the taking the organization through a global change transformation. (IT, HR, Finance & treasury)
 - Platform selection and business case preparation for executive management.
 - Requirement gathering with business and aligning with industry best practice
 - Program planning, Phases, scope, time, cost, quality, resource, Process mapping, release planning
 - Vendor selection, techno commercial negotiation
 - Quality testing and launching. Training and change management to transition w/o business impact
- I was also responsible for the global IT finance control, approval of investments (capex) & finding opportunities for operational cost optimization. Have a good exposure to organization finance process and moving them from simple excel to ERP.
- I am passionate about leveraging digital technologies to add benefit to business. Have implemented RPA for process automation, Power BI for real time dashboards. Constantly update myself on developments in AI, ML, block chain, E-Commerce, cloud technologies, facial recognition and other interesting technologies.
- During my personal time, I work on developing products for education sector to make a social impact. Have been working on a mobile app and a web ERP-CRM solution. This helps me be updated with the technological changes at development layers as well and help work with teams and brainstorm solutions.

Looking forward to an interview opportunity to discuss further on my profile and aspirations to work for your esteemed organization.

Regards
Rajeev Sharma
