WORK EXPERIENCE

Novartis AG: Director - Social Media, Web & Mobile Applications Solutions (2019 – present)

- Completely redesigned the process for managing the lifecycle of externally facing digital engagement assets (e.g. Social media accounts, Websites and mobile applications) to make it an audience-centric, integrated, streamlined and efficient process taking into account potential risks. Collaborated closely across 15 functions to ensure the process seamlessly takes into account all applicable external and internal requirements
- Revamped the adverse event monitoring and reporting process for digital engagement assets resulting in productivity gains and yearly savings of > 500K\$ for all programs
- Simplified Data Privacy requirements for digital engagement assets and Social media listening programs resulting in productivity gains for 95% of the programs
- Authored and rolled out a policy framework including enterprise-wide procedures such as Social Media Listening Standard Operating Procedure (SOP), externally facing Digital engagement assets SOP, Web Accessibility handbook, Domain name and URL handbook
- Ensured implementation of SOPs by applying "compliance by design" principles
- Established and rolled out enterprise-wide tools such as global registry to facilitate lifecycle management of digital engagement assets, Lastpass for password management
- Established 80% automated controls to ensure data quality and transparency
- Project Management Office (PMO) for Next Generation Engagement (NGE) US program with a vision of delivering personalized content to audiences – setup program governance, risk and issue management, budgets, hiring plan and designed workstreams. Introduced a culture of tracking outcomes rather than activities

TECHNICAL SKILLS

C++, VC++, Java

Novartis AG: Senior Manager – Social Media Governance (2017 – 2019)

- Setup a high performing Social Media operational team with 98% customer satisfaction
- Maintained and enhanced the Social Media policy framework through continuous improvement initiatives
- Led a project to transfer activities to Alcon after spin-off from Novartis
- Established a risk-based process and tool for proactively detecting and assessing rogue Social media accounts to manage the risk exposure of Novartis
- Established regular oversight process of company-owned externally facing digital engagement assets by performing internal assessments and overseeing remediation activities
- Supported senior management with investigations into incidents related to social media
- Performed regular risk assessments to generate the heat map of social media risks and provided inputs into Enterprise Risk Management
- Established a process to proactively identify and respond to changes in the social media regulatory landscape worldwide
- Trained over 2000+ associates on Social Media with 100% positive feedback

Ernst & Young AG: Manager – Risk Advisory services (2013 – 2017)

- Led SOX IT audit teams for large audit clients based on pre-defined audit methodology
- PMO for Compensation & Benefits program that completely redesigned the compensation processes at Novartis. Responsible for program governance, risk and issue management, resource allocation, reporting and budget tracking
- Managed the portfolio of HR projects at Novartis. Responsible for resource allocation, progress reporting and budget tracking

Halfmann Goetsch Partner AG: Senior Consultant (2011 – 2013)

- Conducted control-based maturity assessments (SOX IT, GxP, Confidentiality, Integrity, Availability, Data Privacy) on assets including IT applications, databases, platforms, service providers to identify gaps and associated risks. Developed a heat map to present the identified risks to senior management
- Operational Risk Management: Enabled risk portfolio rationalization in alignment with enterprise risk governance framework with focus on the cost-benefit ratio and optimized allocation of resources. Advised on risk treatment decisions and risk mitigation actions resulting in reduction of the entities' risk portfolio by 30% compared to previous year, keeping the resources and budget constant
